

**WHEN THE GOING GETS HOT
KEEP YOUR COOL**

Yamaha DT200N

WATERCOOLED

Yamaha believe that performance and reliability go together. That's why they've packed all the performance features of the legendary YZ range into one dynamite engine — then watercooled it. Next they wrapped it in an advanced handling package featuring Yamaha's famous MONOCROSS system. They combined this with a front disc brake, O-ring chain and quartz halogen headlight to make the DT200 the fastest, best handling and safest bike in its class. Claims from other brands just don't hold water!
